

Church of Saint Peter, Henleaze

Risk Assessment for xxxxxxxx

This Risk Assessment for xxxxxxxxxx, was carried out by xxxxxxxxxxxx.

Potential hazardous situations were identified. The likelihood of a potential hazard occurring was rated as **Low**, **Medium** or **High** and its potential consequence (the most extreme consequence being a death) was similarly assessed. The overall Risk was then assessed as **Low**, **Medium** or **High** based on these Likelihood and Consequence factors. Current procedures to ameliorate the hazard and reduce the risk and suggestions for possible new actions to reduce the risk are listed.

| Hazardous Situation | Likelihood | Consequence | Risk | Action |
|---------------------|------------|-------------|------|--------|
